

Our New LIPOLITE PROGRAM

New State regulations require that each patient have their own prescription and bottle of Lipo injections. The bottle of Lipo injections must leave the compounding pharmacy (who makes our special blend of Lipo) with that patient's name & information.

Our New Lipo Injection Program That Meets Regulations:

- You'll prepay in our office for a prescription bottle of Lipo injections
- We'll write a prescription and place an order with our compounding pharmacy
- Your prescription bottle will arrive at our office within 5 business days
- Each time you come in for a Lipo injection we'll pull your bottle and use it just for you
- Prescriptions are non-refundable and non-transferable

Why can't I get a Lipo shot the same day I pay for my Lipo prescription?

We have to wait until your bottle of Lipo injections arrives before we can administer it. We are not allowed to administer a Lipo shot unless it has come from the pharmacy with the patient's name and prescription number.

Can I purchase just one month worth of shots at a time?

Not under the new program. However, you'll be purchasing a Lipo bottle and have 4 months (16 weeks) to get the shots. **That's less than \$10.00 a shot !!!**

Since the Lipo injections are prescribed to me, can I take the bottle home?

For the safety of our patients our Company policy is that all injections purchased in our office must be stored and administered by us.

****The cost of a 4 month supply of lipo lite is \$150.00****

That's less than \$10.00/injection !!!!
